-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1762

1. This application is a divisional of United States Patent Application No. 10/075,777 filed on February 14, 2002. Claims 1-3 remain in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-3 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The claims recite a method of preparing an electrical component, however, no process steps are recited to perform the process.

The claims appear to be product claims as the claims only recite structure and should be recited as such. It is noted that if this is the case, the claims will be subject to restriction practices upon such an amendment. If the claims are intended to be method claims, claim 2 appears to be no different than claim 1 and the duplicate claims should be canceled. Furthermore, claim 3 recites a number of species for the genus "electrical component" which would render the claims subject to a further restriction requirement for one of the species. Clarification is requested.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Morizumi et al. (6,459,588).

Morizumi et al. (6,459,588) teaches a non-contact IC Card and Fabrication method thereof. Looking at Fig. 1, an antenna circuit (13) formed by printing on a substrate (11). The antenna (13) can be formed by any conventional printing means such as gravure. The printing ink comprises silver particles in a thermosetting resin or binder. Carbon and copper particles and combinations thereof can be used in the ink. The resin binder includes a styrene/maleic copolymer resin (col. 4, lines 8-50).
